U.S. Patent and Trademark Office PTO-303 (Rev. 04-01)

Continuation of 2. NOTE: Amendments to classed, "a weight sensor ... connected to said CPU and "said CPU estimates the body composition ... based upon the personal body information and the weight measured prior to entering the personal body information" raise new issues of definition over the prior art of record.

Continuation of 5. does NOT place the application in condition for allowance because: The term "immediately" is not adequately defined in the disclosure. Thus, even if, in the APA, the event of determination of no-load output is made after entry of personal body information, it may be construed to occur immediately after power up (Fig. 5) as recited in claim 7.
